Hiring Manager
Drive Switch Technology LLC

Dear Hiring Manager,

I am writing to apply for the **Software Developer** position at your organization. With over **two years of professional experience** in software development and a strong academic background, I am eager to contribute to building reliable and innovative digital solutions aligned with business needs.

I am currently pursuing an **M.Tech in Artificial Intelligence from the Indian Institute of Technology (IIT) Patna**, one of India's premier institutes. Previously, I worked as a **Software Development Engineer** and **AI/ML Engineer**, where I was responsible for designing, developing, testing, and maintaining scalable software applications. My work involved developing data-driven systems, optimizing performance, and collaborating closely with cross-functional teams in agile environments.

I have strong proficiency in **Python and Java**, along with hands-on experience in building backend systems, automation pipelines, and production-grade applications. I am comfortable working in a **full-time, work-from-office environment** and value structured collaboration, ownership, and long-term contribution, which aligns well with a permanent role.

I am enthusiastic about the opportunity to join your team and contribute my technical skills, problem-solving ability, and commitment to quality software development. I would welcome the opportunity to discuss how my experience can add value to your organization.

Yours sincerely,

Praveen Jangir
